## 1/10 托福写作-上机操作

	写作	作考试安排		
题目	阅读	听力	作答时间	写作字数
Integrated Writing 综合写作	3 分钟 300 词	2 分钟 330 词	20 分钟	150-225 词
Independent Writing 独立写作	Х	X	30 分钟	多于 300 词

1. 综合写作:口语分项考试结束后,直接进入写作分项。首先是综合写作。

阅读短文。先读一篇短文,快速记下主题和支持的分论点,不要苛求记下所有细节,只抓住最主要的主旨句和例子关系即可,阅读时间结束后,短文消失。

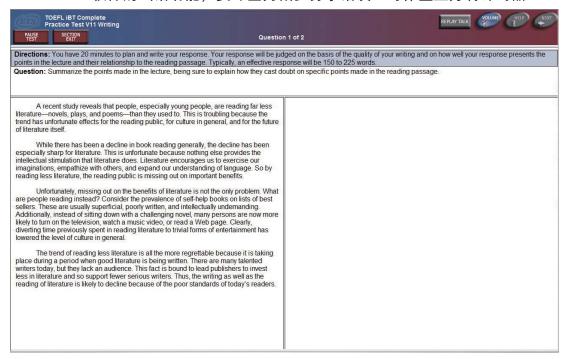

讲座听力。随后,一位教授会针对阅读短文的主题和分论点提出"赞成"或者" 反对"的意见,并给予详细论证,尽全力记下所有听力内容的论点和例证细节。

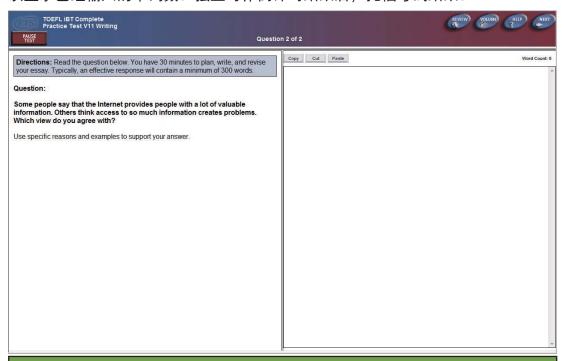

## 1/10 托福写作-上机操作

开始作答。听力结束后,阅读原文再现;屏幕右边为写作区。因为系统没有 Office Word软件的纠错功能,要尽全力减少打字错误。写作区上方有计时器。

2. 独立写作:综合写作结束后,进入独立写作;左侧显示题目,右侧为答题区;在答题区的上方有【COPY】【CUT】【PASTE】键,还有【Word Count】可以显示已经输入的单词数。独立写作倒计时结束后,托福考试结束。

## 中译英热身测试——将独立写作标准段落翻译成英文(计时:5分钟)

①一个大学学位可以为学生们进入社会做更好的准备。②学生们不仅可以学到与专业相关的书本知识,并且还可以习得不同的技能对毕业之后有所帮助。 ③大学始终鼓励独立思维和创新。④诸如学生社团和学生会这样的课外活动项目都可以通过组织、监办会议或管理资金来为学生们提供锻炼社会能力的机会。⑤所有这些技能都对学生今后的事业发展大有助益。

# 2/10 托福写作: 词的用法

	用词准确、恰当、多样					
书面	书面语 cannot, does not, do not, couldn't, wouldn't, shouldn't					
冠词用法						
	, ,	•	ure. ( <b>A</b> / An) uni father when ther	versity re is (a / <b>an</b> ) NBA.		
   冠i		Getting a job will enrich their experience and build up their resume, better preparing them for (the future careers / future careers).				
	1 •		include not only / the) cinema or	a supermarket but also ( <b>a</b> / the KTV).		
		ì	 司的多样性			
误区: "低频生僻词"就是好词。托福写作考察写作能力,不是背单词测试,词频低说明一些词的搭配很少用。我们要以托福评分标准要求 "Appropriate word choice用词恰当,idiomaticity符合习惯"为准侧。不求晦涩,但求灵活。						
				一个单词或词组,就会给评 。我们要积累近义词做替换。		
1	近义词替换	important	essential; cruci	al; significant; critical		
		expensive	expensive costly; unaffordable; prohibitive			
		significant	substantial; cor	nsiderable		
		我们可以抓住	住单词的词根,很	<b>汀生出更多的单词用法</b> 。

#### 句式表达

误区:"迷恋"复杂长句"。句子结构并不是越长越好,而是要把每个重点信 息独立成句,长短搭配才会更有层次感。句子的长短取决于句子表意复杂程度 的要求,要以托福评分标准 "Demonstrating syntactic variety句式丰富"为练 习目标。语感的形成要靠语法规则来保证,语法书可看《百变语法》吴建业。

## 4/10 托福写作: 独立写作——段落结构

### 段落主旨

一个段落,无论句子有多少,都有一个独立的主旨,段落内所有的句子都围绕 这个主旨展开,如果需要表达另一个主旨,需要另起一段。

		段落内部的句子分工
1	Topic Sentence 主旨句	高度概括地表达主旨,一般每个段落就只有一个主旨句, 以短句居多;大都位于段首,也可在段尾,或首尾呼应。
2	Supporting 支撑句	支撑主旨论点,围绕主题展开,可以使用长句表达; 展开采用解释、举例、对比因果、引用等阐述方式。

托福文章的段落层次				
		4 ETL	话题导入,1-2 句	
层次 1	篇首立场段	1段	表明立场观点,1-2 句

伝人 3			重申立场观点,1句	

## 段落连贯,逻辑信号

包括段内连贯和段间连贯。段内是主旨句和支撑句之间的连贯, 段间是各段落之间的承接, 要借助逻辑信号词把文章的逻辑关系交代清楚。

## 5/10 托福写作: 独立写作——审题论证

## 论证的英文思维

审题要用英文思维,而不是中文思维。中文思维更含蓄,喜欢用虚词,很少讲实例。而英文思维更直接,喜欢用具体实例。在论述立场观点的过程中一定要把实例细节发挥到极致,这需要大量练习,积累生活点滴的经验案例。

The factory is a product of both the eighteenth, and even more so, nineteenth centuries. The rise of factories began in England and eventually spread throughout the world. There were three primary reasons as to why this occurred.

Prior to the creation of factories, the majority of work, including making clothes and even metal tools, was done by hand by people in their homes or in small shops. The main technological achievement that enabled the rise of factories was the steam engine. Originally developed in the mid-eighteenth century to pump water out of deep coal mines, the steam engine provided its user with enough power to do the work of many people. The steam engines people owned, therefore, needed to be centralized in protective buildings to maximize their capabilities. Factories were a direct result of this need.

The steam engine and, later, the internal combustion engine, brought about improved transportation thanks to the inventions of the railroad and steamship. Railroads could transport raw materials to a central point, like a factory, where workers and machines could subsequently transform them into finished products. The railroads and steamships could then turn around and transport these goods to markets throughout the world.

Another key point in the rise of factories, particularly in England, was property rights. Subsistence farming had been a way of life for untold centuries. However, many people did not own their own land but merely farmed wherever they could. "Enclosures," land that was enclosed by hedges and fences and owned by individuals, became dominant features in England. Those without any land became the suppliers of cheap labor in factories. Additionally, laws preventing private property from government seizure encouraged both the development of the land's resources and the further construction of factories.

#### Listening

It's unquestionable that several, uh, unique circumstances in England enabled the rise of factories to occur. But new technology, improved transportation methods, and advances in property laws are not the reasons why this happened.

Steam engines were crucial components of the Industrial Revolution, yet they needed to be built from something. In fact, it was in iron foundries, where the development of strong iron and then steel occurred, that the key aspect in the rise of factories took place. Iron and steel were integral components for parts of steam engines, for making trains and ships, and for building the factories themselves.

Nor can transportation account for the rise of factories. Many factories were built near the resources, such as coal and water, which they required. That's why we've seen many industrial centers spring up near coal mines and rivers. Think of the Ruhr in Germany as an example. Also, railroads weren't developed until the 1840s and didn't spread around the world until the end of the nineteenth century. Consider that... Factories have existed for decades prior to the development of railroads. Additionally, sailing ships were very much in use worldwide even into the early twentieth century, so, well, transportation clearly wasn't that important to factories.

The rise of individual property rights in England encouraged the development of factories and provided a large labor pool. However, this wasn't the case in many countries. Let me see...In Russia, the government or noblemen typically owned factories. And many of the first factories in several countries, including England, were used to make weapons or gunpowder for the military. This production was centralized so as to have exact standards for weapons. In fact, there is much evidence that the concept of the factory comes from their early usage as buildings for manufacturing arms.

Question Summarize the points made in the lecture you just heard, explaining how they cast doubt on specific points made in the reading. (150-225 words)		
	Opening	
Intro	The reading passage's author is convinced there were several reasons why the rise of factories occurred in England.  Yet the professor disagrees that they were in the main factors why factories became successful.	
	Body 1	
Relation 1	First, the professor disputes the reading's point that the rise of factories should rely on the steam engine which had to be protected and thus located in buildings.	
Refutation 1	<b>He points out that</b> the real essential factor was the utilization of strong iron and steel which were used to make steam engines, especially since they could also manufacture trains, ships, and factories themselves.	
	Body 2	
Relation 2	Second, the professor opposes to the point made in the reading that the inventions of rails roads and steamships enabled the emergence of factories.	
Refutation 2	The professor rebuts this view by citing that factories were erected nearby the resources, so there is no need for trains to transport raw materials far away. Also, railroads were invented decades after factories and sailing ships were employed in the early twentieth century.	
	Body 3	
Relation 3	Finally, while the reading notes that property rights stimulated the development of factories, the lecture holds a different perspective.	
Refutation 3	The professor explains that the early function of factories in some countries was military-oriented and they were owned by the government rather than individuals. And the early factories were used for the standardized production of weapons, that led to their rise.
